CIRCOR INSTRUMENTATION TECHNOLOGIES RECEIVES ISO 9001 CERTIFICATION FROM TÜVRHEINLAND®

Spartanburg, SC 11/13/2009 — Circor Instrumentation Technologies has received ISO 9001:2000 certification, an internationally recognized standard issued to organizations with a quality management system. The certification was authorized by TÜVRheinland®, a premier global provider of independent testing and certification services with 15 locations throughout North America.

ISO 9001:2000 provides a set of requirements that must be in place to have a quality management system, regardless of the organization's size, product or service line, or public or private status. Certification to the standard is voluntary, and organizations must complete a rigorous auditing process by a third-party registrar.

"We feel that maintaining our ISO certification is very important to our business. It ensures our processes are in place and being followed to deliver value and quality to our stakeholders and customers", stated Graham Sparkes, V.P. of Manufacturing.

About TÜVRheinland®

TÜVRheinland® delivers premier independent testing, assessment, and certification services to help companies gain access into global markets.
